*** what is realistic time table in learning?

It typically takes a few hours to get familiar with QuickBooks, and most new users can feel reasonably comfortable managing finances within a month. Generally, people can expect to understand the software within two to four weeks, depending on their background and effort invested in learning. Mastering advanced features will likely take additional time.

For beginners, expect a few weeks to learn basic tasks like creating invoices and recording expenses. About 15-20 hours of training and practice will help grasp fundamentals. Those lacking an accounting background may need more time.

Learning intermediate or advanced features, like payroll and inventory management, could take extra weeks or months. Ultimately, the duration to learn depends on personal background and learning speed. Engaging in a bootcamp could expedite the process. Investing time upfront will aid in mastering QuickBooks skills faster.
